# Intrinsically Safe Explosion-Proof High-Precision Tuning Fork Scale 

## FZ-Ex series

## Operation Manual

## IMPORTANT

- To ensure safe and proper use of the balance, please read this manual carefully.
- After reading this manual, store it in a safe place near the balance, so you can review it as needed.

## Vî̀BRA

SHINKO DENSHI CO., LTD.

## Preface

Thank you very much for having purchased our dust- and water-proof intrinsic safety explosion-proof structure electronic scale.
This document is the Operation Manual for the following dust- and water-proof intrinsic safety explosion-proof structure electronic scale.

In the first place, install this product properly referring to the Installation Manual attached separately, and then read this document.

## Instructions

- The copyright of this document belongs to SHINKO DENSHI CO., LTD. Reprinting or duplicating of all or part of this document without notice shall not be allowed.
- Please note that product improvement or modification may cause partial discrepancy between the product and the description of this document.
- The description of this document is subject to change without notice.
- This document has been created carefully. If, however, any error or imperfection is found by any chance, please let us know.
- Documents of which pages are missing or irregularly bound will be exchanged. Please inform the store where you purchased the product or our sales department.
- Trouble related to the product or system will be dealt with in accordance with the individual maintenance contract. Please note, however, that we will not take responsibility for consequential trouble such as discontinuation of operation caused by the product trouble.
- Vî̀BR」 is the registered trademark of SHINKO DENSHI CO., LTD. Company names and product names appearing in this document are the trademarks or registered trademarks of the respective company concerned.

## Important Notice

- It should be known that this product contains potential danger. And so please be sure to observe this document when installing, operating or servicing this product.
- SHINKO DENSHI CO., LTD. will not take any responsibility for any injury or damage caused by the non-observance of this document or misuse or unauthorized modification of this product.
- Potential dangers are increasing in the industrial equipment industries due to the advent of new materials and processing methods, and speeding up of machines. It is impossible to foresee all situations related to these dangers. In addition, there are so many "impossible" and "don'ts" and so writing all of them in the operation manual is impossible. Therefore, it is safe to think that what is not written in the operation manual "cannot be performed" unless the operation manual positively writes "it is possible." When performing installation, operation, maintenance or inspection of this product, not only observe what is written or indicated in this document or on the product surface but also pay adequate consideration to safety measures.
- The copyright of this document is held and reserved by SHINKO DENSHI CO., LTD. Duplicating or disclosing its drawings and engineering materials without prior approval of SHINKO DENSHI CO., LTD. in writing is not permitted.
- For any question or further information concerning this document, please contact the store where you purchased the product or with its model (type) name and serial number informed.
- Manufacturer: SHINKO DENSHI CO., LTD.

Adress: 3-9-11 Yushima, Bunkyo-ku, Tokyo 113-0034 JAPAN

## How to use this document

## ■Symbols used in this document

Understand the meaning of the following symbols and observe the instructions of this document.

| Symbols | Meaning |
| :---: | :---: |
| ! DANGER | Used for the situation that invites an imminent risk of death or severe injury unless avoided. |
| $\triangle$ WARNING | Used for the situation that invites a risk of death or serious injury unless avoided. |
| $\triangle$ CAUTION | Used for the situation that damages device/equipment, or destructs, deletes or overtypes data unless avoided. |
| Note | Used for the situation in which special care should be taken or specific information is emphasized |
| Reference | Used for reference information on operation |
|  | Used for "Prohibition" items |
|  | Used for "Mandatory" items requiring positive action |
|  | Used for prohibition items to avoid "Electrical shock". |
| Legal | This symbol indicates a legal metrology. |

-About how to read this document
This document consists of the following contents:

| 1 | When beginning to use | Describes about operating precautions, names <br> and functions of each section, etc. Please be <br> sure to read this section when using this product <br> for the first time. |
| :--- | :--- | :--- |
| 2 | Basic usage | Describes about basic usage related to weighing <br> such as how to turn on and off the power in <br> addition to the setting procedures to set various <br> functions. |
| 3 | Functions related to the operation | Describes about setting items to change the <br> operation of the scale. |
| 4 | Functions related to the performance | Describes about setting items related to the <br> indication stability and the response speed of the <br> scale. |
| 5 | User information setting | Describes about setting items related to the <br> various user's IDs, and their upper and lower <br> limits. |
| 6 | External input/output functions | Describes about setting items related to the <br> specifications and conditions in regard to the <br> external communication. |
| 7 | Functions related to the lock | Describes about setting items related to change <br> prohibitions and invalid keystrokes on each menu <br> item. |
| 8 | Controlling and adjustment functions | Describes about setting items related to the scale <br> ID setting, the span adjustment and the date and <br> time setting. |
| 9 | Execution menu | Describes about menus other than setting <br> menus. |
| 10 | When this is the case | Describes about methods of troubleshooting this <br> product such as how to respond to errors and <br> when you are in need of help. |
| Appendix | Provides necessary data such as the <br> specifications of this product. |  |

■Symbols used in this document
Understand the meaning of the following symbols and observe the instructions of this document.

| This product <br> /The product | Refers to the product. |
| :--- | :--- |
| [On/Off] key | The name of an operation key located in front of the main unit is <br> represented in a bracket ([ ]). |
| "Mode" | A message on the display is represented in double quotation marks <br> ("). |
| Push the key | Signifies pushing lightly an operation key once. |
| Push the key long | Signifies keeping pushing an operation key until the designated <br> indication appears. |

## 1 Prior to use

## 1-1 Precautions

## DANGER

| 0 | - No disassembling or modification. <br> Unless specifically stated in this document, disassembling or modification of this product, mounting or removal of an undesignated component no longer maintains the function of the explosion-proof structure, leading to a serious accident or bodily injury. |
| :---: | :---: |
|  | - Install the power supply box in"non dangerous location." Use of the power supply box in a dangerous place will cause trouble such as an explosion or a fire. |
|  | - Connect the grounding terminal and cables properly. Improper connection of the grounding terminal and cables will cause trouble such as an explosion or a fire. |
| $4$ | - Do not replace fuse, optional slots of the power supply box or access to the AC power terminal when the AC power cord is connected to the mains power. That may cause an electric shock, short-circuiting or failure. Make sure disconnect from the AC mains or shut down the AC mains before accessing to those parts. |
|  | Do not connect the cables with its connector or jack being wet. That may cause an electric shock, short-circuiting or failure. |
|  | Do not wet the power supply box. That may cause an electric shock, short-circuiting or failure. |
|  | - Do not open the AC connector cover unless the power supply box is installed as a built-in unit on a distribution board or other enclosure of which access is permitted to the trained and authorised persons only. That may cause an electric shock, short-circuiting or failure. |

## !. WARNING

| Do not move the device with a sample to be weighed set on the scale. <br> That may cause the sample to fall from the weighing pan, leading to a bodily injury or <br> destruction of the sample. |
| :--- | :--- |
| ■ Do not connect to the main unit the power supply cord, scale cable, or <br> communication cable with its connector or jack being wet. <br> That may cause an electric shock, short-circuiting or failure. |
| ■o not use the product on an unstable table or a place that is subject to <br> vibration. <br> That may cause the article to fall from the weighing pan, leading to a bodily injury or <br> destruction of the article. Besides inaccurate weighing may result. |
| ■ Do not move the scale holding its windshield. <br> That may cause the scale itself to fall, leading to a bodily injury or malfunction of the scale <br> itself. Be sure to hold the main unit of the scale to move it. |
| ■ Do not place an unstable sample on the weighing pan. <br> The sample may fall down and cauyse injury. Put an unstable sample in a container (tare) <br> before weighing it. |

■ Do not use the product in an abnormal condition.
If it should happen that an abnormal event such as smoking or unusual odor occurs, ask the store where you purchased the product for repair. Keeping using the product may result in an electric shock or fire. In addition, do not ever try to repair it for yourself, or very dangerous situation is likely to occur.

- Do not touch the electrode with a wet or dirty hand.

Otherwise, an electric shock or short-circuiting may result.

## A CAUTION

|  | Avoid miswiring of the barrier. <br> Erroneous barrier wiring in the power supply box is likely to cause failure. |
| :---: | :---: |
|  | Do not give a shock to the scale. It may cause breakage or failure. Place a sample to be weighed softly. |
|  | Do not let an overload situation (o-Err indication) continue. <br> It may cause breakage or failure. Remove the sample to be weighed immediately. |
|  | - Do not use volatile solvent. <br> Use of volatile solvent is likely to deform the main unit. Dirt on the main unit should be removed with a piece of dry cloth or cloth wet with small amount of neutral detergent. |

## Note

|  | ■ Do not use the product where wind from an HVAC equipment directly applies. <br> Accurate weighing may be impeded due to the fluctuation of surrounding temperature. |
| :---: | :---: |
|  | Do not use the product where there is direct sun. Accurate weighing may be impeded due to the rise of internal temperature. |
|  | Do not use the product where floor is soft. <br> Accurate weighing may be impeded due to the tilting of the main unit when an object is placed on it. |
|  | Do not use the product where there is violent fluctuation of surrounding temperature or humidity. <br> Accurate weighing may possibly be impeded. Use within a temperature range of 5 to $40^{\circ} \mathrm{C}$ and below a humidity of $85 \%$ RH. |
|  | Do not use the product on an unstable table or a place that is subject to vibration. <br> It may cause not only inaccurate weighing but also the sample to fall from the weighing pan, leading to a bodily injury. |
|  | Be sure to make adjustment at the time of installation or changing a use place. <br> There occurs an error in measurement value. For the sake of accurate measurement, be sure to make adjustment. |
|  | - Check for an error periodically. <br> Use environment and chronological change cause an error in measured value, leading to an inaccurate measurement. |
|  | Align the level of the scale without fail before use. <br> Weighing with a slanted scale causes an error, leading to an inaccurate measurement. Put the scale on a robust place. |

## 1-2 Names and functions of each section

$\begin{array}{ll}1 & \text { Main LCD } \\ 2 \text { Sub LCDs (i03 only) }\end{array}$
3 Main keys
4 Numeric keypad

## 1-3 Performance of operation keys

| No. | Type / name of a key |  |
| :---: | :--- | :--- |
| 1 | [On / Off $]$ | Turns on and off the power for the scale. |
| 2 | [Direction] | Used for function setting. |
| 3 | [Transfer] | Used for outputting. |
| 4 | [Function F] | Used for function calling. |
| 5 | $[$ Tare $]$ | Used for tare weight subtraction. |
| 6 | [Clear Home] | Used for cancelling the setting. |
| 7 | [Enter] | Used for finalizing various setting values. |
| 8 | [Zero] | Used for zero adjustment. |
| 9 | [Preset tare] | Used for setting preset tare weight value. |
| 10 | [Target] | Used for setting the reference value for comparator function. |
| 11 | [High / Low] | Used for setting the upper and lower limit values for comparator <br> function. |
| 12 | [Shift] | Used for inputting the key function indicated in red. |
| 13 | [Recall / Memory] | Used for registering or calling the preset tare weight value or <br> user information. |
| 14 | [Numeric keypad] | Used for inputting a numeric value or setting an ID. |

## 1-4 How to interpret the display

## 1-4-1 Main LCD

| No. | Symbol | Name | Description |
| :---: | :---: | :---: | :---: |
| 1 | 8 | Gram | Represents gram unit. |
| 2 | kg | Kilogram | Represents kilogram unit. |
| 3 | \% | Percent | Lights when in the percent scale mode. |
| 4 | $\rightarrow 0 \downarrow$ | Zero point | Indicates the zero point. |
| 5 | $\uparrow$ | Plus | Plus |
| 6 | $\square$ | Minus | Minus |
| 7 | - Lower right | Shift | Represents that the [Shift] key was pushed. |
| 8 | Net | Tare weight subtraction | Indicates that the tare weight is being subtracted. |
| 9 | PT | Preset tare weight | Indicates the preset tare weight. |
| 10 | $\bigcirc$ | Stable indication | When illuminated: The scale is in the stable condition. When not illuminated: The scale is not in the stable condition. |
| 11 | * | Addition available | - Lights in the standby status. <br> - Addition available status when the adding function is used. |
| 12 | M | Memory access | - Flashes when the scale is in the process of stabilization. <br> - Lights when writing in the memory. |
| 13 | $\Sigma$ | Accumulated values | Lights when various accumulated values are being indicated. |
| 14 | F. | 7-segment display | Displays numbers and simple letters. |
| 15 | $\square$ | Data output | Lights when data are being output to external devices. |
| 16 | $<$ | Discrimination result | Lights when indicating the discrimination result (HI/OK/LO) of the operation of the comparator function. |
| 17 | CAL | Span calibration/adjustment | Lights at the time of span calibration and adjustment. |
| 18 |  | Bar graph | Indicates the present total amount relative to the weighing capacity defined as $100 \%$. |
| 19 | \# | Coefficient scale | Lights when the coefficient scale is effective. |
| 20 | பட் | Weighing accuracy Unguaranteed indication | Lights when accuracy guarantee is difficult due to the condition of span adjustment. |

## 1-4-2 Sub LCDs (i03 only)

-Upper sub LCD

# 8.8.8.8.8.8. <br> $\nabla \nabla \nabla \nabla$ 

Tare High
■Lower sub LCD

| No | Symbol | Name | Description |
| :---: | :---: | :--- | :--- |
| 1 | $\mathbf{g}$ | Gram | Represents gram unit. |
| 2 | $\mathbf{K g}$ | Kilogram | Represents kilogram unit. |
| 3 | $\mathbf{\%}$ | Percent | Lights when in the percent scale mode. |
| 4 | $\boldsymbol{R}$ | 7-segment display | Displays numbers and simple letters. |
| 5 | - | Minus | Minus |
| 6 | $\nabla$ | Arrow | Represents tare weight / upper limit / total amount <br> / lower limit / date / time. |

## 1-4-3 LCD character font

## 2 Basic usage

## 2-1 Turning on / off the power, and checking for the operation

Turn on and off the power for this product.

Turn on the power.

2
Turn on the power for the scale.

The sub LCD is installed only on the i03.
Scale operation check

Turn on the power for the power supply box.
An asterisk ( $\boldsymbol{*}$ ) mark lights on the main LCD, and the product becomes standby status.

## Reference

Setting the direct start function to "ON" shifts to the state of weighing automatically.

Push the [On/Off] key. All displays on the main and sub LCDs light, followed by the self-check of the scale. During the self-check, the LCD displays automatically change.

Completion of the self-check is followed by the weight scale mode.

## a CAUTION

Do not push any key during the self-check.

Press the weighing pan lightly to check if the indication changes.

Turn off the power for the scale.

Push and hold the [On/Off] key.
The product becomes standby status and the symbol ( $\boldsymbol{*}$ ) lights.

Reference
Pushing and holding the [On/Off] key obtains the standby status from any operation status.

## 2-2 Making a zero adjustment

Adjusting the indication to zero is called "zero adjustment."

1
Check the top of the weighing pan.

2 Make a zero adjustment.

Make sure that nothing is placed on the top of the weighing pan.

Push the [Zero] key.
Displays on the main LCD become zero and the symbol " $\boldsymbol{\rightarrow} \mathbf{0 \leftarrow}$ " lights.

|  | (1)It might be possible that the "Zero adjustment" cannot not be performed when an object <br> is placed on the weighing pan. In that case, make the "tare weight subtraction" referring <br> to the "Weighing an object placed on a container (tare)" <br> Reference | (2)Stability waiting during the zero adjustment can be set using the function item "Stability <br> waiting." In the case the "Stability waiting" is set, the symbol "M" flashes during the <br> stability waiting. For its setting method, refer to "3 Functions related to the operation." <br> Legal <br> Metrology(1) "Stability waiting" setting function of the above (2) can not be use. |
| :---: | :--- | :--- |

## 2-2-1 Zero adjustment range when in use

Zero adjustment range when in use is limited in this product.
The available zero adjustment range when in use is shown below:

| Model | Lower limit (g) | Upper limit (g) |
| :--- | :---: | :---: |
| FZ623Ex | -9.3 | 9.3 |
| FZ3202Ex | -48 | 48 |
| FZ6202Ex | -93 | 93 |
| FZ15001Ex | -225 | 225 |
| FZ30K0.1GEx | -450 | 450 |
| FZ60K0.1GEx | -900 | 900 |
| FZ100K1GEx | -1500 | 1500 |
| FZ200K1GEx | -3000 | 3000 |
| FZ150K1GFEx | -2250 | 2250 |
| FZ300K1GFEx | -4500 | 4500 |

## 2-3 Weighing an object placed on a container (tare)

When weighing an object to be weighed with the object placed on a container (tare), the weight of the container must be subtracted from the total weight to get the actual weight of the object to be weighed. This is called "tare weight subtraction."

Place a container on the weighing pan.

Perform the tare weight subtraction.

Sub LCD display (i03 only )
3 Place an object to be weighed on the container.

4 Clear the tare weight.

The weight of the container is displayed.

Push the [Tare] key.
The indication changes to zero and the "Net" symbol lights.

The indication changes to zero and the
" Net " symbol lights.

The net weight of the object to be weighed alone is indicated.

Remove the tare and the object to be weighed from the weighing pan.
[Push the [Zero] key or the [Tare ] key.
The indication changes to zero and the" Net " symbol goes out.

| Reference |  | Performing the tare weight subtraction narrows the weighing range as much as the amount of the tare weight mass (tare weight). <br> Weighable range = weighing capacity - tare weight <br> Stability waiting during the tare weight subtraction can be set using the function item "Stability waiting." In the case the "Stability waiting" is set, the symbol "M" flashes during the stability waiting. For its setting method, refer to " 3 Functions related to the operation". <br> When using a tare whose tare weight is already known, the tare weight subtraction can be performed in advance by inputting its tare weight (preset tare weight subtraction). For its setting method, refer to " 5 User information setting". <br> When turning on the power placing a tare that exceeds the zero adjustment range at the time of power supply, the tare weight subtraction is executed. |
| :---: | :---: | :---: |
| Legal <br> Metrology |  | Operation of the above (4) is not performed. |

## 2-4 Weighing with an object to be weighed added

Place an added object to be weighed and weigh the weight of the added object.
Performing the tare weight subtraction with the object to be weighed which has been already weighed makes it possible to weigh the mass of a next object to be weighed with the previous object to be weighed remaining placed.

Place an object to be weighed.

Sub LCD display ( i03 only )
2 Perform the tare weight subtraction.

Sub LCD display ( i03 only )
3 Place an additional object to be weighed.
Push the [Tare] key.
The indication changes to zero and the "Net" symbol lights.

The indication changes to zero and the " Net " symbol lights.

The mass of the added object alone is indicated.

## 2-5 Selecting the main LCD indication

The main LCD and the sub LCD can be used in combination with each other.
The content of main LCD indication changes in the following sequence:

| Reference | In the case the percent scale function and the adding function are set, selection <br> (switching) of the main LCD indication is available. (Refer to " 3 Functions related to the <br> operation".) |
| :--- | :--- |

## 2-6 Selecting the sub LCD indication (i03 only)

The main LCD and the sub LCD can be used in combination with each other.
The content of main LCD indication changes in the following sequence:

|  | When power is turned off, the previous indication is maintained. <br> Example) Power is turned off when the tare weight and the time are indicated. <br> The next time power is turned on, the LCD indication appears with the tare weight and <br> the time being displayed. |
| :--- | :--- |

## 2-7 Basic operation

The menu of this product is divided into two as described below:
(1) Setting menu

The menu to set a variety of functions
(2) Execution menu

The menu not to set but only to execute the program.

## 2-7-1 Hierarchy of a setting menu

The setting menu of this product is divided into four, from the first layer to the third layer and for various settings.

## 2-7-2 Operation of the setting menu, setting of various functions

To perform settings for various functions from the state of weighing, chiefly execute the following procedure.
(1) Push [Function F] key to enter respective setting from the state of weighing.
(2) Shift to the intended setting item using the [Direction] key.
(3) Change the setting value using the [Enter] and [Direction] key.

(2) [Direction] key $\Rightarrow$ Shift to the intended setting item.
(3) [Enter] and [Direction] keys $\Rightarrow$ Change the setting value.

To return to the state of weighing after setting various functions, chiefly execute the following procedure.
(1) Push the [Shift] and then [Clear Home] keys at any of the first, second or third layer.

## 2－7－3 Operation of the setting menu，inputting of numeric values

■Example）When inputting 12345
1 Input＂1＂．

2 Input＂2＂．

3 Input＂ 3 ＂，＂ 4 ＂and＂ 5 ＂in sequence．

4 Fix the numeric values that have been input．
Enter
$\square$ Return to the original menu．

Push the［Enter］key．
Return to the original menu
5 When inputting a numeric value with a minus symbol（－）attached

Push the［Numeric keypad］＂1．＂
Number＂ 1 ＂is displayed on the extreme right like 「 1」．
Push the［Numeric keypad］＂2．＂
Number＂ 12 ＂is displayed on the extreme right like 「 12」 with the previously input＂ 1 ＂moving to the left．

Push the［Numeric keypad］＂ 3 ＂，＂ 4 ＂ and＂ 5 ＂in sequence．

Push the［Shift］key and then［ $\cdot(+/$
$-)]$ keys in sequence．
Input a numeric value referring to step 1 to 4 above．

Before pushing the［Enter］key，pushing the［Clear Home］key enables you to input a numeric value again．

## 2－7－4 Operation of the setting menu，inputting of characters

－Operation of character input
1
Push the［Numeric keypad］＂ 2 ＂

■ Example）When inputting ABC
1 Input＂A＂

2 Input＂B＂

R $\square$

Push the［Numeric keypad］＂ 2 ＂． Number＂ 2 ＂is displayed on the extreme left like 「2 」．

Push the［Numeric keypad］＂ 2 ＂again． Letter＂A＂is displayed on the extreme left like 「A 」． After that，every time the［Numeric keypad］＂ 2 ＂is pushed，the letter changes to＂$B$＂then＂$C$ ．＂

Push the［Numeric keypad］＂2＂． Number＂ 2 ＂is displayed on the extreme left like 「2 」．

Push the［Numeric keypad］＂2＂again． Letter＂ A ＂is displayed on the extreme left like「A 」．
［Push＂Right＂of the［Direction］key． The digit that has been input moves to the right．

Keep pushing the［Numeric keypad］＂ 2 ＂ till the indication changes to

3 Input "C"

4 Discontinue inputting.

Return to the original menu.

Push "Right" of the [Direction] key.
The digit that has been input moves to the right.
Keep pushing the [Numeric keypad] "2" till the indication changes to" $\ulcorner\mathrm{ABC} \quad \mathrm{J}$ ".

Push "Right" of the [Direction] key. The digit that has been input moves to the right.

Push the [Enter] key.
Character inputting completes, return to the original menu indication.

| Each push of the1 <br> symbol changes the indication as shown below: |
| :---: | :---: | :---: |
| ※ Returns to "1" at the 4th time |
| (Hyphen) |

## 3 Functions related to the operation

Settings to change the scale operations

## 3-1 Hierarchy of functions related to the operation

## 3－2 Unit setting

Unit in the weight mode can be set either in 「g」or $\lceil\mathrm{kg}$ 」．
Select a setting menu．
Select the unit setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Decide the unit．

Inputting of the setting value
3 Finish the unit setting．

Push the［Direction］key．
Select「111．UA．」．
Input a setting value．
「111．UA．1」：g「111．UA．2」：kg

Push the［Shift］and then the［Clear
Home］keys．
The operation mode changes to the weight scale mode and the unit that has been set is indicated．

Legal
Metrology
Unit that can be used to the model of Max $100 \mathrm{~kg}-300 \mathrm{Kg}$ is only＂111．UA．2：kg＂．

## 3－3 Percent scale function

The weight of an object to be weighed is indicated in percent relative to the reference weight．
Select a setting menu．
Select the percent scale．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）

Set the operation mode to the percent scale mode．

| 园 「盛 | ting of the setti |
| :---: | :---: |

value
3 Finish the setting．

Switch the indication mode to the percent scale mode．

$\square$

Push the［Direction］key．
Select 「12．PW．」
Input a setting value．
「12．PW．1」：ON
「12．PW．0」：OFF

Push the［Shift］and then the［Clear Home］keys．
The operation mode returns to the weight scale mode．
Push＂Up＂or＂Down＂of the ［Direction］key．
\％」appears on the indicator， showing that the operation mode has been changed to the percent scale mode．

## 3－4 Adding function

Weighs a plurality of objects to be weighed in sequence and indicates its total value．
The adding function includes two ways of calculating method．

| Addition accumulating function | Method of weighing objects to be weighed while replacing the objects |
| :--- | :--- |
| Net adding function | Method of weighing objects to be weighed without replacing the <br> objects |

The adding function can be used in any scale mode，i．e．weight scale mode，percent scale mode，and coefficient scale mode．

Select a setting menu．
Select the adding function．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2
Set the adding function．
13 int．
Inputting of the setting value
Push the［Direction］key．
Select 「131．AT．」．
Input a setting value．
「131．AT．0」：OFF
「131．AT．1」：ON
3 Select the addition accumulating function or the net adding function．

1Э2．月n．

> Inputting of the setting value

Select either the plus side addition or the minus side addition．

1ヨヨ．dr．
Inputting of the setting value
5 Finish the setting．

6 Switch the indication to the addition mode．

Push the［Direction］key．
Select「132．AM．」． Input a setting value．

「132．AM．1」：Addition accumulated
「132．AM．2」：Net addition

Push the［Direction］key．
Select 「133．DR．」．
Input a setting value．
「133．DR．1」：Plus side addition
「133．DR．2」：Minus side addition
Push the［Shift］and then the［Clear Home］keys．
The operation mode returns to the weight scale mode．

Push＂Up＂or＂Down＂of the ［Direction］key．
$\lceil\boldsymbol{\Sigma} \downharpoonleft$ appears on the indicator， showing that the operation mode has been changed to the addition mode．

## 3－4－1 Weighing by means of the plus side addition

1
Place a first object to be weighed．

2 In the case of the addition accumulating
Replace an object to be weighed with a new one．

3 In the case of the net addition Add an object to be weighed．

4
Indicate the accumulated value．

5 Clear the accumulated value．

After 「＊」 appears，push［Enter］key． The weighed value is stored and $\lceil\boldsymbol{\Sigma} \downharpoonleft$ is indicated for a few seconds．

Remove the previous object to be weighed to return the indication to zero and then place a next object to be weighed．
After 「＊」 appears，push［Enter］key． The weighed value is stored and 「 $\boldsymbol{\Sigma}\rfloor$ is indicated for a few seconds．
Repeat this operation to perform addition．

Add an object to be weighed without doing any other operation．
After 「 $\boldsymbol{*}$ 」 appears，push［Enter］ key．
After indicating $\lceil\boldsymbol{\Sigma} \downharpoonleft$ and the accumulated value for a few seconds，the scale returns to the weight indication， followed by the automatic tare weight subtraction．
Repeat this operation to perform addition．

Push the［Direction］key．
$\ulcorner\boldsymbol{\Sigma} 」$ and the accumulated value are indicated．

Push the［Clear Home］key．
The accumulated value is cleared．

## 3－4－2 Weighing by means of the minus side addition

1 Place an object to be weighed and perform the tare weight subtraction．

2 Remove the object to be weighed and perform adding calculation．

3 Remove a next object to be weighed and perform adding calculation．

4．Indicate the accumulated value．

Remove the object to be weighed without doing any other operation．
After 「＊」 appears，push［Enter］key．

After indicating $\ulcorner\boldsymbol{\Sigma} \downharpoonleft$ and the accumulated value for a few seconds，the scale returns to the weight indication， followed by the automatic tare weight subtraction．
Repeat this operation to perform addition．

Push the［Direction］key．
$\lceil\boldsymbol{\Sigma} 」$ and the accumulated value are indicated．

Push the［Clear Home］key．
The accumulated value is cleared．

## 3-5 Comparator function

It is possible to preset threshold values and determine whether or not a measured value is within the range defined by the preset values.

| Reference | The comparator function can be used in any scale mode, i.e. weight scale mode, <br> percent scale mode, and coefficient scale mode. |
| :--- | :--- |

## 3-5-1 How to perform discrimination

Set the lower and the upper limits. Then, whether or not the weight of an object to be weighed is low (lower than the lower limit), appropriate or high (higher than the upper limit) is indicated on the main LCD with

| Single point (lower limit) setting |  |  | Single point (upper limit) setting |  |  | Two-point(upper and lower limits) setting |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Over the upper limit | Appropriate amount | Below the lower limit | Over the upper limit | Appropriate amount | Below the lower limit | Over the upper limit | Appropriate amount | Below the lower limit |
| H1 ок ⿺0 | H1 ${ }_{\text {OK }}^{\text {L0 }}$ | H1 | H1 | H1 | H1 ок L0 |  |  |  |

## 3-5-2 Discrimination criteria, and upper and lower limits setting

The discrimination is performed according to the following criteria:

| Absolute value | The discrimination is performed based on the upper and lower limit values that <br> have been set in advance. |
| :--- | :--- |
| Relative value | A reference numeric value is set in advance, and the discrimination is performed <br> based on the range defined by the upper and lower limit values that have been <br> set for the reference numeric value. |

## 3－5－3 Comparator function setting

1
Select a setting menu．
Select comparator function．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂3－1 Hierarchy of functions related to the operation＂）
2 Set comparator function．

## 14 tht．

Inputting of the setting value

3 Set discriminant conditions．

## 14ㄹ․

Inputting of the setting value

4 Set a discriminant range．

```
|4그...
```

Inputting of the setting value

5 Set a discriminant method．

Inputting of the setting value

Push the［Direction］key．
Select 「141．BT．」． Input a setting value．
「141．BT．0」：OFF
「141．BT．1」：Upper and lower limits valid
「141．BT．2」：Upper limit alone valid
「141．BT．3」：Lower limit alone valid
Push the［Direction］key to select「142．CO．」 Input setting values
「142．CO．1」：Discrimination at all times
「142．CO．2」：Discrimination only at stable times

Push the［Direction］key．
Select 「143．LI．」
Input a setting value．
「143．LI．1」：More than 5d
「143．LI．2」：More than 50d
「143．LI．3」：Entire area
Push the［Direction］key．
Select 「144．TY．」
Input a setting value．
「144．TY．1」：Absolute value discrimination
「144．TY．2」：Deviation value discrimination

For the setting of the reference value and upper and lower limit values，refer to＂ 5 User information setting＂．

## 3－6 Buzzer setting

This is a convenient function for key inputting and use of the comparator function．
1 Select a setting menu．
Select the buzzer setting function．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Select the buzzer mode setting．

Inputting of the setting value

Push the［Direction］key．
Select 「151．TN．」
Input a setting value．
「151．TN．0」：OFF
「151．TN．1」：At the time of －numeric value fixation／error．
「151．TN．2」：At the time of －numeric value fixation／error． －key input／error． －keypad operation．

3 Select the buzzer tone setting．
15こht．
Push the［Direction］key．
Select 「152．BT．」
Input a setting value．

| 「152．BT．1」： | Low |
| :--- | :--- |
| 「152．BT．2」： | Medium |
| 「153．BT．3」： | High |

## 3－7 Bar graph indication

Set the indication／non－indication of the bar graph．
Select a setting menu．
Select the bar graph indication．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Set the bar graph indication．

Inputting of the setting value

Push the［Direction］key．
Select 「16．BG．」．
Input a setting value．
「16．BG．0」：OFF
「16．BG．1」：ON

## 3－8 Conditions for stability waiting

Can not be used．

Set when to indicate the weighed value after the zero adjustment or tare weight subtraction； either after or before the weighed value stabilizes．

Select a setting menu．
Select the conditions for stability waiting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Set the conditions for stability waiting．

Inputting of the setting value

Push the［Direction］key．
Select 「17．TA．」
Input a setting value．
「17．TA．0」：OFF
「17．TA．1」：ON

## 3－9 Tare weight value storage function

Can not be used．

The tare weight subtraction is performed with the mass stored at the time of power supply． This function is used when turning on and off the power with a tare and an object to be weighed placed on the weighing pan．

## Select a setting menu．

Select the tare weight value storage function．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Set the tare weight value storage function．

10 ． Ar ．
Inputting of the setting value

Push the［Direction］key．
Select 「18．AR．」． Input a setting value．

「18．AR．0」：OFF
「18．AR．1」：ON

## 3－10 Direct start

Setting to the direct start makes it possible to turn on and off the power with the switch on the power supply box without pushing the［On／Off］key．

Select a setting menu．
Select the direct start function
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Set the direct start function．
Push the［Direction］key．
Select 「19．DS．」
Input a setting value．
Inputting of the setting value
「19．DS．0」：OFF
「19．DS．1」：ON

## 3－11 Auto power－off

This function is to automatically turn off the power for the main unit．
Select a setting menu．
Select the auto power－off function．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $3-1$ Hierarchy of functions related to the operation＂）
2 Set the auto power－off function．

Inputting of the setting value

Push the［Direction］key．
Select 「1B．PO．」
Input a setting value．
「1b．PO．0」：Invalid
「1b．PO．1」： 3 min
「1b．PO．2」： 5 min
「1b．PO．3」： 10 min
「1b．PO．4」： 30 min

## 4 Function srelated to the performance

Set the scale indication stability and response speed.

## 4-1 Hierarchy of functions related to the performance

[^0]
## 4－2 Zero tracking

Setting to the zero tracking function makes it possible to automatically correct the zero point fluctuation caused by the temperature fluctuation，etc．that is likely to occur when＂ 0 ＂is indicated，through which the＂ 0 ＂indication is maintained．

Select a setting menu．
Select the zero tracking function．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂4－1 Hierarchy of functions related to the performance＂）
Set the zero tracking function．

Inputting of the setting value

Push the［Direction］key．
Select「21．ZT．」 Input a setting value．

「21．ZT．0」：Stop
「21．ZT．1」：0．5d
「21．ZT．2」：1d
「21．ZT．3」：2d
「21．ZT．4」：4d

## 4－3 Stability discrimination width

The larger numeric value is set，the higher stability is obtained．
Select a setting menu．
Select the stability discrimination width．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂4－1 Hierarchy of functions related to the performance＂）

2 Set the stability discrimination width．

Inputting of the setting value

Push the［Direction］key．
Select 「22．SD．」 Input a setting value．

| 「22．SD．1」：$\pm 0.5 \mathrm{~d}$ | （Severe） |
| :--- | :--- |
| 「22．SD．2」：$\pm 1 \mathrm{~d}$ |  |
| 「22．SD．3」：$\pm 2 \mathrm{~d}$ |  |
| 「22．SD．4」：$\pm 3 \mathrm{~d}$ |  |
| 「22．SD．5」：$\pm 4 \mathrm{~d}$ |  |
| 「22．SD．6」：$\pm 8 \mathrm{~d}$ |  |
| 「22．SD．7」：$\pm 12 \mathrm{~d}$ |  |
| 「22．SD．8」：$\pm 18 \mathrm{~d}$ | （Moderate） |

（Severe）
（Moderate）
＂22．SD．3－8＂can not be used．

## 4－4 Stability discrimination frequency

Can not be used．
The larger numeric value is set，the higher stability is obtained．
Select a setting menu．
Select the stability discrimination frequency．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂4－1 Hierarchy of functions related to the performance＂）

2 Set the stability discrimination frequency．

Inputting of the setting value

Push the［Direction］key． Select「23．SC．」 Input a setting value．

「23．SC．0」： 16 times
「23．SC．1」： 10 times
「23．SC．2」： 8 times
「23．SC．3」： 4 times
「23．SC．4」： 2 times
「23．SC．5」： 1 times（Moderate）

## 4－5 Response speed

The larger numeric value is set，the higher stability is obtained．
Select a setting menu．
Select the response speed．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $4-1$ Hierarchy of functions related to the performance＂）
2 Set the response speed．

Inputting of the setting value

Push the［Direction］key． Select 「24．RE．」
Input a setting value．
「24．RE．1」： 1 （Quick）
「24．RE．2」： 2
「24．RE．3」： 3
「24．RE．4」： 4
「24．RE．5」： 5 （Slow）

## 4－6 Weight renewal interval

Can not be used．

This is a function to output data at regular intervals．
Select a setting menu．
Select the sampling time．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂4－1 Hierarchy of functions related to the performance＂）

2
Set the sampling time．

Inputting of the setting value

Push the［Direction］key．
Select 「25．TI．」
Input a setting value．
「25．TI．0」：Variable
「25．TI．1」：0．1S
「25．TI．2」：0．2S
「25．TI．3」：0．4S
「25．TI．4」：0．8S

## 5 User information setting

Set various user IDs and upper and lower limit values.

## 5-1 Hierarchy of user information setting

| Reference | (1) It is possible to register a number for an ID up to a maximum of ten digits. <br> (2) Up to 100 IDs that have been set can be registered individually from "001" through <br> "100". For how to register, refer to "9 Execution menu." |
| :--- | :--- |
|  | The characters that can be combined for use for an ID are as shown below: <br> (3pace (blank), 0-9, A - F, - (minus)] <br> For the details of the character input, refer to "2-7-4 Operation of the setting menu, <br> inputting of characters". |

## 5-2 Measurer's ID setting

An ID can be provided for each measurer.
Select a setting menu.
Select the measurer's ID.
("2-7-2 Operation of the setting menu, setting of various functions" and " $5-1$ Hierarchy of user information setting")
2 Set the measurer's ID.

בirn $\Rightarrow$ In mputing of the 10
("2-7-4 Operation of the setting menu, inputting of characters")

Push the [Direction] key. Select 「31.MS.」

Input an ID.

## 5－3 Product name ID setting

An ID can be provided for each product name．
Select a setting menu．
Select the product name ID．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $5-1$ Hierarchy of user information setting＂）

2 Set the product name ID．

（＂2－7－4 Operation of the setting menu，inputting of characters＂）

Push the［Direction］key． Select 「32．PD．」 Input an ID．

## 5－4 Lot number setting

A number can be provided for each lot．
Select a setting menu．
Select the lot number．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $5-1$ Hierarchy of user information setting＂）

2 Set the lot number．

（＂2－7－4 Operation of the setting menu，inputting of characters＂）

Push the［Direction］key．
Select「33．LT．」
Input characters．

## 5－5 Code number setting

A number can be provided for each code．
Select a setting menu．
Select the code number．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $5-1$ Hierarchy of user information setting＂）

2 Set the code number．

（＂2－7－4 Operation of the setting menu，inputting of characters＂）

Push the［Direction］key．
Select「34．CD．」
Input characters．

## 5-6 Preset tare weight setting

Inputting, registration and calling of a preset tare weight value can be performed.

## 5-6-1 Inputting of a preset tare weight value

There are two ways of inputting a reference value and upper and lower limit values as described below:

- Numeric value setting method: Inputting a setting value directly via [Numeric keypad] operation
- Actual value setting method: Weighing a sample with a scale and then making it a setting value

Select a setting menu.
Select the preset tare weight setting.
("2-7-2 Operation of the setting menu, setting of various functions" and " $5-1$ Hierarchy of user information setting")
Set the preset tare weight setting.

Push the [Direction] key. Select「35.PT.」

Input a tare weight value with the [Numeric keypad]. Push the [Enter] key.

The tare weight value is stored.
("2-7-3 Operation of the setting menu, inputting of numeric values")
3' Set a tare weight value. [Actual value setting method]

The operation mode returns to the scale mode.

Sub LCD indication( i03 only )
5 To exit the preset tare weight subtraction mode

Push the [Function F] key. Place an object to be weighed that is equivalent to the tare weight value.

Push the [Enter] key. The tare weight value is stored.
Return to the scale mode with the [Shift] and the [Clear Home] keys.

The preset tare weight value is indicated. The tare weight is indicated on the sub LCD

Push the [Preset tare] key. Push [Numeric zero] key. Push the [Enter] key. Now the preset tare weight subtraction mode has exited.

Set a tare weight value. [Numeric value setting method]

Sub LCD indication( i03 only )
("2-7-3 Operation of the setting menu, inputting of numeric values")
1, Set a tare weight value. [Actual value setting method]

Sub LCD indication( i03 only )
2 To exit the preset tare weight subtraction mode

Push the [Preset tare] key in the scale mode.

Input a preset tare weight value with the [Numeric keypad].
Push the [Enter] key.
The preset tare weight value is indicated. The tare weight is indicated on the sub LCD.

Push the [Preset tare] key in the scale mode.
Push the [Function F] key.
Place an object to be weighed that is equivalent to the tare weight value.

Push the [Enter] key.
Remove the object to be weighed.
The preset tare weight value is indicated. The tare weight is indicated on the sub LCD.

Push the [Preset tare] key.
Push [Numeric zero] key.
Push the [Enter] key.
Now the preset tare weight subtraction mode has exited.

## 5-6-2 Registration of a preset tare weight value

Nine preset tare weight values can be registered.

1 Set a preset tare weight value.
("2-7-2 Operation of the setting menu, setting of various functions" and " $5-1$ Hierarchy of user information setting")
2 Register the preset tare weight value.

An indication of "PUSH 1-9" appears on the sub LCD.

Input a registration number with [Numeric keypad].

## 5-6-3 Calling of a preset tare weight value

The registered preset tare weight value can be called.

Call the preset tare weight value.

Push the [Preset tare] key. Push the [Recall / Memory] key.

An indication of "PUSH 1-9" appears on the sub LCD.

Input a call number with [Numeric keypad].
Push the [Enter] key.
The preset tare weight value is indicated.
The tare weight is indicated on the sub LCD.

## 5-7 Setting of a percent scale reference value

The weight of an object to be weighed is indicated in percent relative to the reference weight. Set the reference weight by way of either the numeric value setting method, which requires the inputting of a numeric value, or the actual value setting method, which requires the weighing of a sample.

## 1 Select a setting menu.

Select the percent scale.
("2-7-2 Operation of the setting menu, setting of various functions")
2 Set the operation mode to the percent scale mode.
"3-3 Percent scale function"
3 Set the reference value of the percent scale.

4 Set the reference value. [Numeric value setting method]

("2-7-3 Operation of the setting menu, inputting of numeric values")
4, Set the reference value. [Actual value setting method]

5 The operation mode returns to the scale mode.

Push the [Function F] key.
Place an object to be weighed that is equivalent to the reference value.
Push the [Enter] key.
The reference value is stored
Returns to the scale mode with the [Shift] and the [Clear Home] keys.

The weight of the object to be weighed is indicated in percent relative to the reference weight.

7 Switch the main LCD.

| Reference | An indication of "L-Err" signifies that the reference weight is below the limit weight and that the weight is unmeasurable. |  |  |
| :---: | :---: | :---: | :---: |
|  | Percent scale limit weight |  |  |
|  | FZ623Ex | 0.1 g |  |
|  | FZ3202Ex, 6202Ex | 1 g |  |
|  | $\begin{aligned} & \text { FZ15001Ex } \\ & \text { FZ30K0.1GEx, FZ60K0.1GEx } \end{aligned}$ | 10g |  |
|  | $\begin{aligned} & \hline \text { FZ100K1GEx, FZ200K1GEx } \\ & \text { FZ150K1GFEx, FZ300K1GFEx } \end{aligned}$ | 100 g |  |

## 5-8 Setting of the discrimination value of the comparator function

There are two ways of inputting a reference value and upper and lower limit values as described below:

- Numeric value setting method: Inputting a setting value directly via [Numeric keypad] operation
- Actual value setting method: Weighing a sample with a scale and then making it a setting value

## 5-8-1 Numeric value setting method

Select a setting menu.
Select the discrimination value setting of the comparator function.
("2-7-2 Operation of the setting menu, setting of various functions")

2 Select the reference value setting. (In the case of the relative value discrimination)

Push the [Direction] key.
Select "37.TS."
Push the [Direction] key.
Select "371.TG.".
Push the [Enter] key.

3 Set a reference value.

("2-7-3 Operation of the setting menu, inputting of numeric values")

4
Select the upper limit value setting.

5 Set an upper limit value.

("2-7-3 Operation of the setting menu, inputting of numeric values")
6 Select the lower limit value setting.

7 Set a lower limit value.

(max. 7 digits)
("2-7-3 Operation of the setting menu, inputting of numeric values")
8
The operation mode returns to the scale mode.

9
Indication of the sub LCD (i03 only)

Upper limit value

Lower limit value

| Reference | The discrimination value setting of the comparator function can be performed out of the <br> scale mode as a shortcut according to the following procedure: |
| :--- | :--- |

Select the reference value setting. (In the case of the relative value discrimination)

("2-7-3 Operation of the setting menu, inputting of numeric values")

2 Set an upper limit value.

("2-7-3 Operation of the setting menu, inputting of numeric values")

3 Set a lower limit value.

("2-7-3 Operation of the setting menu, inputting of numeric values")

4
Indication of the sub LCD (i03 only)

Push the [Target] key in the scale mode.
Input a reference value with [Numeric keypad].
Push the [Enter] key.
The reference value is set.

Push the [High / Low] key in the scale mode.
Input an upper limit value with [Numeric keypad]. Push the [Enter] key.
The upper limit value is set.

Push the [Shift] key and the [High /
Low] key in the scale mode.
Input a lower limit value with [Numeric keypad].
Push the [Enter] key.
The lower limit value is set.

The upper and lower limit values that have been set are indicated on the sub LCD.

## 5-8-2 Actual value setting method

1 Select a setting menu.
Select the discrimination value setting of the comparator function.
("2-7-2 Operation of the setting menu, setting of various functions")

2 Select the reference value setting. (In the case of the relative value discrimination)

3 Set a reference value.

4 Select the upper limit value setting.

5 Set an upper limit value.

6 Select the lower limit value setting.

Push the [Direction] key.
Select "37.TS."
Push the [Direction] key.
Select "371.TG."
Push the [Enter] key.

Push the [Function F] key.
Place an object to be weighed that is equivalent to the reference value.
Push the [Enter] key.
The reference value is stored.

Push the [Direction] key.
Select "37.TS."
Push the [Direction] key.
Select "372.HI."
Push the [Enter] key.
Push the [Function F] key.
Place an object to be weighed that is equivalent to the upper limit value.

Push the [Enter] key.
The reference value is stored.

Push the [Direction] key.
Select "37.TS."
Push the [Direction] key.
Select "373.LO."
Push the [Enter] key.

7 Set a lower limit value.

Push the [Function F] key.
Place an object to be weighed that is equivalent to the lower limit value.
Push the [Enter] key.
The lower limit value is stored.

8 The operation mode returns to the scale mode.

9 Indication of the sub LCD (i03 only)

Upper limit value
Returns to the scale mode with the [Shift] and the [Clear Home] keys.

The upper and lower limit values that have been set are indicated on the sub LCD.

## Reference <br> The discrimination value setting of the comparator function can be performed out of the scale mode as a shortcut according to the following procedure:

Select the reference value setting. (In the case of the relative value discrimination)

2 Set an upper limit value.

3 Set a lower limit value.

4 Indication of the sub LCD ( i03 only)

Upper limit value

Lower limit value

Push the [Target] key in the scale mode.
Push the [Function F] key.
Place an object to be weighed that is equivalent to the reference value.
Push the [Enter] key.
The reference value is stored.

Push the [High / Low] key in the scale mode.
Push the [Function F] key.
Place an object to be weighed that is equivalent to the upper limit value.
Push the [Enter] key.
The reference value is stored.
Push the [Shift] key and the [High /
Low] key in the scale mode.
Push the [Function F] key.
Place an object to be weighed that is equivalent to the lower limit value.
Push the [Enter] key.
The lower limit value is stored.

The upper and lower limit values that have been set are indicated on the sub LCD.
(1) When the upper and lower limit values that were set have been found to be the other way around, three $\left\lceil<_{J}\right.$ indicators on the main LCD will light. Re-set the upper and lower limit values.
(2) Combination input, e.g. numeric value input for the upper limit value and actual value input for the lower limit value, is also available.

Rerer
(3) In the case the relative value discrimination is selected, input a difference value relative to the reference value.
For example, when making a discrimination in the case the upper limit value $=3000 \mathrm{~g}$, and the lower limit value $=1000 \mathrm{~g}$ :
Make a setting at reference value $=2000 \mathrm{~g}$, the upper limit value $=1000 \mathrm{~g}$, and the lower limit value $=-1000 \mathrm{~g}$.

## 5-9 Coefficient value setting

Can not be used.

The value that is obtained by multiplying a measured weight by a predetermined coefficient can be indicated.
For example, in the case the coefficient is " 2.35 " and the measured weight is " 2000 g ", a value of " 4700 g " is indicated.
(Example) Object to be weighed (2000 g) $\times$ coefficient (2.35) $\rightarrow$ Indication (4700)
Select a setting menu.
Select the coefficient scale.
("2-7-2 Operation of the setting menu, setting of various functions")

2 Set the coefficient scale setting.

Push the [Direction] key.
Select "38.CF."
Push the [Enter] key.
3 Set a coefficient value.

("2-7-3 Operation of the setting menu, inputting of numeric values")

Input a coefficient value with the
[Numeric keypad].
Push the [Enter] key.
The coefficient value is stored.

4 The operation mode returns to the scale mode.

5 The object is weighed.

Returns to the scale mode with the [Shift] and the [Clear Home] keys.

The value obtained by multiplying the measured weight by the predetermined coefficient is indicated.

## 6 External input/output functions

This function is used for communication through the external peripheral devices.

## 6-1 Hierarchy of the external input/output functions

Can not be used.

## 6-2 Connecter terminal numbers and their functions

Input/output to and from an external device such as a personal computer via the RS-232C is available. The RS-232C interface for this product is the D-SUB9P type.
The RS-232C connector pin alignment for this product is as shown below:

D-SUB9P male connector Cable fixing screw : No.4-40 UNC

| Terminal no | Signal name | Input/output | Function |
| :---: | :---: | :---: | :---: |
| 1 | - | - | - |
| 2 | RXD | Input | Incoming data |
| 3 | TXD | Output | Transmit data |
| 4 | - | - | - |
| 5 | GND | - | Signal <br> grounding |
| 6 | - | - | - |
| 7 | - | - | - |
| 8 | - | - | - |
| 9 | - | - | - |

## 6-3 FZ communication format (CRC provided)

Please contact our local dealer for details.

## 6-4 GZIII format

## 6-4-1 Basic communication specification

| Items |  |
| :--- | :--- |
| Line used | Specific line |
| Communication method | Full-duplex communication method |
| Synchronization method | Asynchronous communication method |
| Circuit construction |  |
| Electrical specification |  |

## 6-4-3 Meaning of the data

| Symbol | Code | Description |  |
| :---: | :---: | :---: | :---: |
| [S1] (1 character) Represents the status. |  |  |  |
| (SP) | $0 \times 20$ | Data stable |  |
| * | $0 \times 2 \mathrm{~A}$ | Data unstable |  |
| [C1] (1 character) Represents the result of comparator function. |  |  |  |
| (SP) | $0 \times 20$ | Comparator result : | Proper(OK) or No result |
| H | $0 \times 48$ |  | Over(HI) |
| L | $0 \times 4 \mathrm{C}$ |  | Shortage(LO) |
| 1-5 | 0x31-0x35 |  | Rank(1-5) |

[T1-T6] (6 characters) Represents the type of the data.

| (SP) | (SP) | (SP) | (SP) | (SP) | (SP) | 0x20 | 0x20 | 0x20 | 0x20 | 0x20 | 0x20 | Net amount (not tared) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| N | E | T | (SP) | (SP) | (SP) | 0x4E | 0x45 | 0x54 | 0x20 | 0x20 | 0x20 | Net amount (tared) |
| P | T | (SP) | (SP) | (SP) | (SP) | $0 \times 50$ | 0x54 | $0 \times 20$ | 0x20 | 0x20 | 0x20 | Preset tare weight |
| T | A | R | E | (SP) | (SP) | $0 \times 54$ | 0x41 | $0 \times 52$ | $0 \times 45$ | 0x20 | 0x20 | Tare weight |
| T | 0 | T | A | L | (SP) | $0 \times 54$ | 0x4F | $0 \times 54$ | $0 \times 41$ | 0x4C | 0x20 | Accumulated value (Total value) |
| G | R | 0 | S | S | (SP) | $0 \times 47$ | 0x52 | 0x4F | $0 \times 53$ | 0x53 | 0x20 | Total amount (Gross) |
| [D1-D12] (12 characters) Numeric value data is stored. |  |  |  |  |  |  |  |  |  |  |  |  |
| + |  |  |  |  |  | 0x2B |  |  |  |  |  | When the data are 0 or positive |
| - |  |  |  |  |  | 0x2D |  |  |  |  |  | When the data are negative |
| 0-9 |  |  |  |  |  | 0x30-0x39 |  |  |  |  |  | Numeric value (0-9) |
| . |  |  |  |  |  | $0 \times 2 \mathrm{E}$ |  |  |  |  |  | Decimal point (floating decimal point) |
| [ |  |  |  |  |  | 0x5B |  |  |  |  |  | The number surrounded by '['and']' |
| ] |  |  |  |  |  | 0x5D |  |  |  |  |  | means auxiliary indication |
| (SP) |  |  |  |  |  |  |  |  |  |  |  | -Spaces fill the top of the data. <br> -Output to the least significant digit in the absence of a decimal point -Unused high-oder digit |
| [U1, U2] (2 characters) Represents the unit of numeric value data. |  |  |  |  |  |  |  |  |  |  |  |  |
| (SP) |  |  | g |  |  | 0x20 |  |  | 0x67 |  |  | g (gram) |
| k |  |  |  | g |  |  | 0x6B |  |  | 0x67 |  | kg (kilogram) |
| (SP) |  |  |  | \# |  |  | 0x20 |  |  | $0 \times 23$ |  | \# (coefficient scale) |
| (SP) |  |  |  | \% |  |  | 0x20 |  |  | 0x25 |  | \% (percent) |

## 6-4-4 Input command composition

Composed of four characters including a terminator ( $\mathrm{CR}=0 \mathrm{DH} / \mathrm{LF}=0 \mathrm{AH}$ ).

| 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: |
| C 1 | C 2 | CR | LF |

## 6-4-5 Transmission procedure

Send an input command from an external device to the scale.
Since transmission and reception are performed by way of full-duplex communication method, the input command can be transmitted irrespective of the transmission timing from the scale.

2
When the scale has successfully executed the input command received, the scale sends a normal response or the data requested by the input command. In the case of unsuccessful completion or reception of an invalid input command (error), the scale sends an error response. In the normal operation, the scale normally sends a response within one second after an input command is transmitted.
However, the response is sent after completion of the processing when:
(1) A tare weight subtraction command or a zero adjustment command is received when the setting menu is set to the "17.TA. 1 Stability waiting", or
(2) It takes time to process the input command received.

In addition, input commands received in other than the scale mode are neglected. input command till receiving a response from the scale.

## 6-4-6 Command format

$\triangle$ CAUTION Please take care not to take alphabetical "O" for Arabic number "0."

## 6-5 GZII format

This is different from " $6-4$ GZIII format" only in the operation of the T-command. In the GZII format, the tare weight subtraction / zero adjustment is executed by the T-command. For other specifications, please refer to "6-4 GZIII format".

## 6-5-1 Command format

CAUTION
Please take care not to take alphabetical "O" for Arabic number " 0 ."

| C1 | C2 | Code <br> (C1) | Code <br> (C2) | Description | Response |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| 0 | 8 | 0x4f | 0x38 | One-time instant output |  |  |
| 0 | 9 | $0 \times 4 \mathrm{f}$ | 0x39 | One-time output after stability is obtained |  |  |

## 6-6 Response

## 6-6-1 Response command format (when set to the A00, Exx format)

Composed of five characters including a terminator (CR=0DH / LF=0AH)

| 1 | 2 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: |
| A1 | A2 | A3 | CR | LF |

## 6-6-2 Response command

| A1 | A2 | A3 | Code (A1) | Code (A2) | Code (A3) | Description |
| :---: | :---: | :---: | :---: | :---: | :---: | :--- |
| A | 0 | 0 | 41 H | 30 H | 30 H | Normal completion |
| E | 0 | 1 | 45 H | 30 H | 31 H | ※Command error <br> (Abnormal command received) |
| E | $0-9$ | $0-9$ | 45 H | $30 \mathrm{H}-39 \mathrm{H}$ | $30 \mathrm{H}-39 \mathrm{H}$ | (Other than E01) <br> Interruption of processing, <br> erroneous completion of <br> processing, other errors |

## 6-6-3 Response command format (when set to the ACK, NAK format)

Composed of one character with no terminator
1

## 6-6-4 Response command

| A1 | Code (A1) | Description |
| :---: | :---: | :---: |
| ACK | 06 H | Positive response |
| NAK | 15 H | Negative response |

## 6-7 External contact input (tare weight subtraction / zero adjustment / tare weight subtraction \& zero adjustment)

Making the RXD signal (terminal no. 2) of the power supply box communication Lo active for longer than 400 ms makes the contact input valid.
Reference
Data can be output even during the selection of external contact input.
$\triangle$ CAUTION
(1) While external contact input is selected, command input is not available.
(2) There is no response command corresponding to external contact input.

## 6－8 Power supply box communication setting

Perform the power supply box communication setting in line with the peripheral device to which the output is transmitted．

Select a setting menu．
Select the power supply box communication setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂6－1 Hierarchy of the external input／output functions＂）

Set the input conditions．

Push the［Direction］key．
Select＂411 ．IC．＂．
Input a setting value．

3 Set the output operation．

Inputting of the setting value

Push the［Direction］key．
Select＂412．OO．＂．
Input a setting value．
「412．00．0」：OFF
「412．OO．1」：ON

4
Set the output conditions． 4 ZinL．

Inputting of the setting value

5 Set the comparator output． 4 14．ra．

Inputting of the setting value

Set the communication condition． 415.61.

Inputting of the setting value

7 Set the parity bit．
416.9 F

Inputting of the setting value

8 Set the data bit．
41 Indi．
Inputting of the setting value

Push the［Direction］key．
Select＂413．OC．＂．
Input a setting value．

| 413．OC．0］： | Output stop |
| :---: | :---: |
| 「413．OC．1」： | Continuous output at all times |
| 「413．OC．2」： | Continuous output at stable times |
| 「413．OC．3」： | After transfer key is pushed down，once instantly |
| 「413．OC．4」： | Auto output |
| 「413．OC．5」： | Once at stable times （Output stop at unstable times） |
| 「413．OC．6」： | Once at stable times （Continuous output at stable times） |
| 「413．OC．7」： | After transfer keypad is pushed down，once at stable times |

Push the［Direction］key．
Select＂414．RO．＂．
Input a setting value．
「414．RO．1」：As per the output setting of the power supply box
「414．RO．2」：Outputwhen discrimination result is OK or absent

Push the［Direction］key． Select＂415．BL．＂． Input a setting value．「415．BL．1」： 1200 bps「415．BL．2」： 2400 bps「415．BL．3」： 4800 bps

Push the［Direction］key． Select＂416．PA．＂．
Input a setting value．
「416．PA．0」：None
「416．PA．1」：Odd number
「416．PA．2」：Even number
Push the［Direction］key．
Select＂417．DL．＂．
Input a setting value．
「417．DL．1」： 7 bits
「417．DL．2」： 8 bits

9 Set the stop bit．
10
Set unused high order digit．

## 4 19．．п．

Inputting of the setting value
11
Set the response command format．
4 4．2n． 4.
Inputting of the setting value
12
Set the output data format．
4 ibidf．
Inputting of the setting value
13 Set the net value status output．

## 4 IL．nt．

Inputting of the setting value

Push the［Direction］key．
Select＂418．ST．＂．
Input a setting value．
「418．ST．1」： 1 bit
「418．ST．2」： 2 bits

Push the［Direction］key．
Select＂419．NU．＂．
Input a setting value．
「419．NU．0」：Fill with 0（30h）．
「419．NU．1」：Fill with a blank space（20h）．
Push the［Direction］key．
Select＂41A．ES．＂．
Input a setting value．
「41A．ES．1」：＂A00，Exx＂format
「41A．ES．2」：＂ACK，NAK＂format
Push the［Direction］key．
Select＂41B．DF．＂．
Input a setting value．
「41B．DF．1」：6－digit numeric value format
「41B．DF．2」：7－digit numeric value format
Push the［Direction］key．
Select＂41C．NT．＂．
Input a setting value．
「41C．NT．0」：None
「41C．NT．1」：Append

Legal
Metrology
Output conditions＂413．oc．1＂，＂413．oc．3＂＂413．oc．6＂can not be used．

## 6－9 Maintenance setting

Setting menu＂42．DL．＂are for the purpose of service maintenance．Please refrain from performing setting．

A CAUTION
If you should have performed setting，please notify the store where you purchased the product．

## 7 Functions related to the lock

Perform the setting for the prohibition of change of menu items and the disabling of key operation，etc．

## 7－1 Hierarchy of functions related to the lock

## 7－2 Locking of functions related to the operation

Various setting menus can be locked．
Select a setting menu．
Select the menu lock setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $7-1$ Hierarchy of functions related to the lock＂）
2 Set the functions related to the operation lock．

Inputting of the setting value

3 Set the functions related to the performance lock．

Inputting of the setting value

Push the［Direction］key． Select＂511．BL．＂．
Input a setting value．
「511．BL．0」：Modifiable
「511．BL．1」：Unmodifiable

Push the［Direction］key．
Select＂512．PL．＂．
Input a setting value．
「512．PL．0」：Modifiable
「512．PL．1」：Unmodifiable

4
Set the user information setting lock．

Inputting of the setting value

Push the［Direction］key． Select＂513．UL．＂． Input a setting value．

「513．UL．0」：Modifiable
「513．UL．1」：Unable to Read／Write
「513．UL．2」：Unable to Write

5 Set the external input／output setting lock．

Inputting of the setting value

Push the［Direction］key．
Select＂514．IL．＂．
Input a setting value．
「514．IL．0」：Modifiable
「514．IL．1」：Unmodifiable

## 7－3 Key lock function

Key operation can be locked．
Select a setting menu．
Select the key lock setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $7-1$ Hierarchy of functions related to the lock＂）
2
Set the functions related to the operation lock．

## 52 ． HL ．

Inputting of the setting value

Push the［Direction］key． Select＂52 ．KL．＂． Input a setting value．

「52．KL．0」：No restriction
「52．KL．1」：On／Off key invalid
「52．KL．2」：All keys invalid

## 7－4 Total lock release

All locks that have been set can be released．
Select a setting menu．
Select the total lock release setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $7-1$ Hierarchy of functions related to the lock＂）
2
Set the total lock release．

Inputting of the setting value

Push the［Direction］key．
Select＂53．CL．＂
Input a setting value．
「53．CL．0」：No total release
「53．CL．1」：Total release

## 8 Controlling and adjustment functions

Perform setting of the scale ID, the span adjustment and the date and time.

## 8-1 Hierarchy of controlling and adjustment functions

## 8－2 Outputting of the span adjustment result

| Legal |
| :---: | :---: |
| Metrology |$\quad$ Can not be used．

The span adjustment result can be output to a dedicated printer．
Select a setting menu．
Select the outputting of the span adjustment result．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）

2 Set the outputting of the span adjustment result．

Inputting of the setting value

Push the［Direction］key．。 Select＂611．OC．＂． Input a setting value．

「611 ．OC．0」：To be output
「611 ．OC．1」：Not to be output

## 8－3 Span adjustment history

This is a function to check the span adjustment history．Ten history records can be stored in all．

Select a setting menu．
Select the indication of the span adjustment history． （＂2－7－2 Operation of the setting menu，setting of various functions＂and＂8－1 Hierarchy of controlling and adjustment functions＂）
2
Select the span adjustment history．
Б12．3h．

3 Select a history to be checked．

Push the［Direction］key．。 Select＂612．SH．＂．

Push the［Enter］key．。 The indication changes from＂CAL． HIST．＂to＂HIS．1＂．
Push the［Direction］key．
With each pushing of the［Direction］key， the indication changes to＂HIS．2＂，＂HIS． 3＂－－－－－till＂HIS．10＂．

Confirm the history.

5 The operation mode returns to the scale mode.

Return to the scale mode with the [Shift] and the [Clear Home] keys.

## 8-4 Scale ID setting

An ID can be set to discriminate a vessel.
Select a setting menu.
Select the scale ID setting.
("2-7-2 Operation of the setting menu, setting of various functions" and "8-1 Hierarchy of controlling and adjustment functions")
2 Set the scale ID.

Push the [Direction] key to select "613.ID.". Input an ID.
" $2-7-4$ Operation of the setting menu, inputting of characters"

## 8-5 Maintenance setting

Setting menu "614.LI." are for the purpose of service maintenance. Please refrain from performing setting.

| $\triangle$ CAUTION | If you should have performed setting, please notify the store where you purchased the <br> product. |
| :--- | :--- |

## 8－6 Date and time setting

1 Select a setting menu．
Select the date and time setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Set the date and time．

＂2－7－4 Operation of the setting menu，inputting of characters＂

## 8－7 Date indication format

Date indication format can be selected．
Select a setting menu．
Select the date indication format．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Set the date indication format．

Inputting of the setting value

Push the［Direction］key．
Select＂616．DD．＂．
Input a setting value．
「616 ．DD．1」：Year，Month，Day
「616 ．DD．2」：Day，Month，Year
「616 ．DD．3」：Month，Day，Year

## 8－8 Output character setting

Characters output to a dedicated printer can be selected．
Select a setting menu．
Select the output character setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Set the output character．

Inputting of the setting value

Push the［Direction］key．
Select＂617．PF．＂．
Input a setting value．
「617．PF．1」：English
「617．PF．2」：Japanese

## 8－9 Password control

This function is used for controlling by a password．

Select a setting menu．
Select the password control setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Set the password control．

```
E lg.f!
```

Inputting of the setting value

Push the［Direction］key．。
Select＂618．PM．＂
Input a setting value．
「618 ．PM．1」：Valid
「618 ．PM．0」：Invalid

## 8－10 Password change

$\triangle$ CAUTION
Take care not to forget the password．If you should forget it，please notify the store where you purchased the product，or our sales department or service center．

Reference A password is not set at the time of shipment．
Select a setting menu．
Select the password change．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Set the password change．

Push the［Direction］key．。
Select＂619．CP．＂．
Input a password．
Push the［Enter］key．。
＂2－7－4 Operation of the setting menu，inputting of characters＂
3
The operation mode returns to the scale mode．

Push the［Direction］key．。 Select＂619．CP．＂．
Return to the scale mode with the［Shift］ and the［Clear Home］keys．

## 8-11 Password cancellation history

This function is used for checking the password cancellation history. 100 history records are stored in all.

Select a setting menu.
Select the password cancellation history.
("2-7-2 Operation of the setting menu, setting of various functions" and " $8-1$ Hierarchy of controlling and adjustment functions")
2 Select the password cancellation history.

## E IR.Ph

3 Select a history to be checked.

4 Confirm the history.

5 The operation mode returns to the scale mode.

Push the [Direction] key.
Select "61A.PH."

Push the [Enter] key.。
The indication changes to "HIS. 1".
Push the [Direction] key.
With each pushing of the [Direction] key, the indication changes to "HIS. 2", "HIS. 3" ----- till "HIS. 100".

Push the [Enter] key.
The indication changes to "Date".
With each pushing of the [Enter] key, the indication changes to "Time", "PASS 0" and "Date" sequentially.

The indication returns to the history selection in the end.

Return to the scale mode with the [Shift] and the [Clear Home] keys.

## 8－12 Operation of minimum weight indication

Can not be used．

This is to be set when using the minimum weighed value indication function．
Select a setting menu．
Select the operation of minimum weighed value indication．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
value indication．

## 5 thor．

Inputting of the setting value

Push the［Direction］key．
Select＂61B．OC．＂．
Input a setting value．
「61B ．OC．1」：Operable
「61B ．OC．0」：Inoperable

## 8－13 Minimum weight indication value setting

| Legal |
| :---: | :---: |
| Metrology |$\quad$ Can not be used．

This is a function valid only when＂ 61 B ．OC． 1 ＂is set in＂ 8 －12 Operation of minimum weight indication＂．

Select a setting menu．
Select the minimum weight indication value setting．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）

Select the minimum weight indication value setting．

Push the［Direction］key．
Select＂61C．MA．＂
Input a minimum weighed value．
Inputting of a minimum weighed value．
（＂2－7－3 Operation of the setting menu，inputting of numeric values＂）
（1）Indication of a value smaller than the preset minimum weighed value flashes．
Reference
（2）A value indicated smaller than the preset minimum weighed value is not output to an
（2）external device．

## 8－14 Designation of minimum indication

Select a setting menu
Select the designation of minimum indication．
（＂2－7－2 Operation of the setting menu，setting of various
functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）

2 Designate a minimum indication．

## 5 id．df．

Inputting of the setting value

Push the［Direction］key．
Select＂61D．DA．＂ Input a setting value．

「61D．DA．1」： 1 count
「61D．DA．2」： 2 counts
〔61D．DA．3」： 5 counts
〔61D．DA．4」： 10 counts
「61D．DA．5」： 20 counts
61D ．DA．6」： 50 counts
「61D ．DA．7」： 100 counts

## 8－15 Reset to the factory settings

Select a setting menu．
Select the factory settings．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Reset to the factory settings．

E IE．in．
Inputting of the setting value

Push the［Direction］key． Select＂61E．IN．＂ Input a setting value．「61E ．IN．0」：Not to be reset「61E ．IN．1」：To be reset

## 8－16 Span adjustment

Can not be used．
Span adjustment is to decrease the difference between an indicated value and the true value（mass）．
This must be performed without fail in the case of doing high－accuracy weighing work．
Because an electronic scale is affected by the acceleration of gravity，adjustment is needed at every weighing location．The adjustment is also needed when（1）using a long period and（2）an accurate indication does not appear any longer．

| $A$ CAUTION | （1） <br> An external weight used for the span adjustment shall be the one equivalent to the <br> OIML F1 class． |
| :--- | :--- | :--- |
| （2）The span adjustment significantly affects the weighing accuracy．Please read this <br> procedure carefully before getting to the adjustment． |  |

Select a setting menu．
Select the span adjustment．
（＂2－7－2 Operation of the setting menu，setting of various functions＂and＂ $8-1$ Hierarchy of controlling and adjustment functions＂）
2 Select the span adjustment．

52 If E ．
Select the minimum indication

（List of the reference＂8－14 Designation of minimum indication＂）

Push the［Direction］key．
Select＂621．CE．＂
Push the［Enter］key．
The indication changes to＂SEL．DA．＂
Push the［Direction］key and select a setting value．
「SEL．DA．1」： 1 count
「SEL．DA．2」： 2 counts
「SEL．DA．3」： 5 counts
「SEL．DA．4」： 10 counts
「SEL．DA．5： 20 counts
「SEL．DA．6」： 50 counts
「SEL．DA．7」： 100 counts
Push the［Enter］key．

Select a weight used for the span adjustment. (1)

## [R LDE it

value

(List of the reference " 8 -16 Span adjustment")
5 Select a weight used for the span adjustment. (2)

【When USER IN is selected
[RLAE it $\square$

(List of the reference " 8 -16 Span adjustment")
6 Zero-point adjustment starts.

After an indication of "CALWE IT" appears for one second, the indication changes to the indication of weight selection used for the span adjustment.

Push the [Direction] key and select a weight used for the span adjustment.

Push the [Enter] key.

After an indication of "CALWE IT" appears for one second, the indication changes to the indication of weight selection used for the span adjustment.

Push the [Direction] key and select a weight used for the span adjustment.

Select "USER IN"
Input with [Numeric keypad] the weight value used for the span adjustment.

Push the [Enter] key.

The indication changes to the flashing of "CAL EHT", "on 0", and then "on 0", followed by the starting of the zero-point adjustment.

After completion of the zero-point adjustment and the indication changing to "on F.S.", place the weight in the center of the weighing pan.
The indication changes to "PUSH F".
Push the [Function F] key.
The indication changes to the flashing of "on F.S.", followed by the start of the span adjustment.

On completion of the span adjustment, the indication automatically changes to "BUSY" then "END", followed by return to the state of weighing.

8 Outputting of the span adjustment result
In the case " $8-2$ Outputting of the span adjustment result" was set to " '611 .OC. 0': To be output", the span adjustment result is output to a peripheral device.

Reference At the models of Max 30kg or more, "PUSH F" is indicated at step 7.

## 8-17 Setting for maintenance

Setting menu "622.C2. to 625.R5." are for the purpose of service maintenance. Please refrain from performing setting.
$\triangle$ CAUTION
If you should have performed setting, please notify the store where you purchased the product.

## 9 Execution menu

## 9-1 Operation of the execution menu

To operate the execution menu from the state of weighing, chiefly execute the following procedure.
(1) Push the [Shift] and [Function F] keys to enter the execution menu from the state of weighing.
(2) Shift to the intended execution item using the [Direction] key.
(3) Perform execution / numeric value and/or character input with the [Enter] key.

## 9-2 Calling of the registered user information

This is a function to call the setting that was registered in "9-3 Registration of user information".

Select the execution menu mode.
Select the user information calling.
("9-1 Operation of the execution menu")
2
Select a user to be called.

Push the [Direction] key.
Select "1.UIR."
Push the [Enter] key.
An indication of "1. UIR. 001" appears.
(The three-digit number flashes.)
Input a number with [Numeric keypad].

("2-7-3 Operation of the setting menu, inputting of numeric values")

3 Call the user information.

Push the [Enter] key.
The number that was input is fixed and an indication of $\ulcorner\mathbf{M}\rfloor$ lights, followed by automatic return to the state of weighing.

|  | (1)If you should have input a wrong number with [Numeric keypad], push the [Clear <br> Reference | Home] key to return it to the number entering screen. <br> (2) <br> Push the [Shift] and [Clear Home] keys to return it to the state of weighing. <br> (3) <br> The initial value of the user information has been set to "001". |
| :--- | :--- | :--- |

## 9-3 Registration of user information

This is a function to register the content set in " 5 User information setting".

Select the user information registration.
("9-1 Operation of the execution menu")
2 Select user information to be registered.
Push the [Direction] key.
Select "2.UIR."

Push the [Enter] key.。
An indication of "2. UIR. 001" appears.
(The three-digit number flashes.)
Input a number with [Numeric keypad].

## 2.u i. $2.4 W^{4} 4$

("2-7-3 Operation of the setting menu, inputting of numeric values")

3 Register the user information.

Push the [Enter] key.。
The number that was input is fixed and an indication of $\ulcorner\mathbf{M}\rfloor$ lights, followed by automatic return to the state of weighing.

## 9-4 Calling of device setting information

This is a function to call from the backup memory the setting value of a setting menu item. Select the execution menu mode.
Select the calling of device setting information.
("9-1 Operation of the execution menu")
2 Select the device setting information.

3 Password authentication
("2-7-4 Operation of the setting menu, inputting of characters")

4 Deployment of a model-specified setting information

$\square$

$\square$

Push the [Direction] key. Select "3.AAR."
Push the [Enter] key.。
Input a password.

Push the [Enter] key.
The content of the setting is deployed. An indication of $\lceil\mathbf{M}\rfloor$ lights, followed by automatic standby.

## 9-5 Storage of device setting information

This is a function to back up the present setting menu items.
Select the execution menu mode.
Select the storage of device setting information.
("9-1 Operation of the execution menu")

Password authentication
("2-7-4 Operation of the setting menu, inputting of characters")

3
Store the device setting information.

$\square$

Input a password.

Push the [Direction] key.。 Select "4.AAS.".
Push the [Enter] key.
Store the content of the setting.
An indication of $\lceil\mathbf{M}\rfloor$ lights, followed by automatic return to the state of weighing.

## 9-6 Printing of the GLP header

This is a function to add the GLP header at the time of printing.
 Set the output operation to " 412.00 . 1 " in the " $6-8$ Power supply box communication setting".

Select the GLP header printing.
("9-1 Operation of the execution menu")

2 Print the GLP header.

Push the [Direction] key.
Select "5.GLP.HED".
Push the [Enter] key.
An indication of "OUTPUT" appears.
Returns to the weighing mode automatically.

## 9-7 Printing of the GLP footer

This is a function to add the GLP footer at the time of printing.

| Reference | Set the output operation to "412. 00. 1 " in the "6-8 Power supply box communication <br> setting". |
| :--- | :--- |

Select the execution menu mode.
Select the GLP footer printing.
("9-1 Operation of the execution menu")
2 Print the GLP footer.
Push the [Direction] key.
Select "6.GLP.FOT".
Push the [Enter] key.

An indication of "OUTPUT" appears.
Returns to the weighing mode automatically.

## 9-8 Program number and check sum indication

1 Select the execution menu mode.
Select the program number and check sum indication.
("9-1 Operation of the execution menu")
2 Indicate program number.

3 Indicate check sum.

Push the [Direction] key. Select "7.PROG.NO". Push the [Enter] key. Indicating section program number is indicated.

Push the [Enter] key again.
A weighing section program number is indicated.

Push the [Enter] key. Indicating section check sum is indicated.

Push the [Enter] key again.
Weighing section check sum is indicated.

4 The operation mode returns to the scale mode.

Push the [Enter] key.
Returns to the state of weighing.

## 9-9 Outputting of weight data

| Reference | Output to Power supply box: <br> Set the output operation to "412. OO. 1" in "6-8 Power supply box communication <br> setting". |
| :--- | :--- |

## 9-9-1 Outputting of tare weight

Select the execution menu mode.
Select the output of tare weight.
("9-1 Operation of the execution menu")
2 Output a tare weight.

Push the [Direction] key.
Select "8.TAR.OUT".
Push the [Enter] key.
An indication of "OUTPUT" appears.
Returns to the weighing mode automatically.

## 9-9-2 Outputting of gross weight

1 Output a gross weight

Pusu the [Shift] key.
Push the [ $\wedge$ ] key.

## 9-9-3 Outputting of accumulated value.

1 Output an accumulated value

Push the [Transfer] key when accumulated value is indicated in the main LCD.

## 9-10 Indication of minimum weighed value

Legal
Metrology

Can not be used.

The minimum weighed value set in the " 8 - 13 Minimum weight indication value setting" can be checked.

Select the execution menu mode.
Select the indication of minimum weighed value.
("9-1 Operation of the execution menu")
2 Indicate the minimum weighed value.

Push the [Direction] key.
Select "9.MAB.VAL".
Push the [Enter] key.
The minimum weighed value that has been set is indicated.

3 The operation mode returns to the scale mode.

Push the [Enter] key.
Returns to the state of weighing.

## 10 Troubleshooting

## 10-1 Error messages

| Message | Cause | Countermeasures |
| :---: | :---: | :---: |
| o-Err | The weight of an object to be weighed is in excess of the weight of the weighing capacity. <br> The addition result or calculation result has exceeded the number of indication digit. | - Remove the object to be weighed, divide it into two or more, and then weigh them again. <br> - Replace the tare with a lighter one. <br> - If the error still persists even after removing the object from the weighing pan, damaging of the mechanism section is suspected. Please notify the store where you purchased the product. <br> - Clear the calculation result, and then execute the addition computation. |
| u-Err | - Negative load has exceeded the lower limit. | - Improper setting of the weighing pan or pan base is suspected. <br> - Check for contact with other object. <br> - If the error still persists even after re-setting the weighing pan or pan base, damaging of the mechanism section is suspected. Please notify the store where you purchased the product. |
| $\begin{aligned} & \text { b-Err } \\ & \text { d-Err } \end{aligned}$ | - Has been affected by static electricity or noises. | Turn off the power supply box once, and then turn on it again. If the same error still persists, damaging of the electric section is suspected. Please notify the store where you purchased the product. |

| Message | Cause | Countermeasures |
| :---: | :---: | :---: |
| L-Err | - Sample weight is too light in comparison with the memorized reference mass of the percent scale. |  |
| t-Err | - Addition computation was executed doubly due to erroneous adding operation. <br> - Zero or minus addition computation was executed on the plus side addition computation. <br> - Zero or plus addition computation was executed on the minus side addition computation. | - Return the indication to zero, confirm that an asterisk「** mark lights and then execute the operation of addition computation. <br> - When the indication is " 0 " or in the negative state, addition computation cannot be executed. Place an object to be weighed before executing addition computation. <br> - When the indication is " 0 " or in the positive state, addition computation cannot be executed. Remove the object to be weighed to make it negative state before executing addition computation. |
| Locked | - In the state of being locked | - Release the lock of a function concerned from the setting menu. (Refer to " 7 Functions related to the lock".) |

| Message | Cause | Countermeasures |
| :---: | :---: | :---: |
| Err001 | A system error | Take a note of the error number <br> and notify the store where <br> you purchased the product. |
| Err099 |  |  |

| Message | Cause | Countermeasures |
| :--- | :--- | :--- |
| Err100 | • Communication error in the weighing | • Check the scale cable connection. |
| Err101 | section |  |

## Appendix 1-2 Functional specification

| Weighing system | Tuning fork vibration type |
| :---: | :---: |
| Protection class | IP65 |
| Type of scale | Weight scale / Percent scale / Coefficient scale |
| Functions | Adding functions (addition accumulating, net addition, plus side addition, minus side addition) <br> Comparator function (2-point setting, 3-point discrimination, absolute value / relative value discrimination) <br> Buzzer setting, Direct start, <br> Tare weight value storage, Preset tare weight subtraction, Tare weight output, <br> Gross weight indication, Indication unit selection ( $\mathrm{g} / \mathrm{kg}$ ), Minimum indication selection <br> Minimum weight indication function, ISO / GLP / GMP functions, Lock function, Span adjustment history <br> Password setting, Auto power-off <br> Storage and calling of device setting information (one item), Storage and calling of user information (100 items) |
| Indication | Main LCD <br> No backlight, 7-segment, 7 digits max. <br> Segment height: 25 mmh , width: 12.5 mm , slope angle (italic type): $3^{\circ}$ <br> Weight indication: 7 digits, Message indication: 7 digits, Bar graph <br> indication: 20 steps <br> Sub LCD (Type i03) only <br> No backlight, 7 -segment, 7 digits max. <br> Segment height: 11.7 mmh , width: 5.8 mm , slope angle (italic type): $3^{\circ}$ <br> Weight indication: 7 digits, Message indication: 7 digits |
| Zero, tare weight subtraction | Zero adjustment with [Zero] key (Stability waiting: yes/no selectable) Actual weight subtraction with [Tare] key (Stability waiting: yes/no selectable) |
| Zero tracking | Provided (Can be disabled via setting) |
| Overload indication | When indication limit is exceeded, "o-Err" is indicated. (See Appendix 1-1 "Connectable scales".) |
| Standard output | IR communication (Infrared communication) RS-232C bidirectional output |
| Span adjustment | Span adjustment by the use of an external weight |
| Power | Dedicated power supply box |
| Main unit weight | Indicator section i02: Approx. 1.7 kg <br> i03: Approx. 1.8 kg |

| Operating temperature |
| :--- | :--- |
| $/$ humidity | | Temperature: |
| :--- |
| Scale section and Indicator section : $+5^{\circ} \mathrm{C} /+40^{\circ} \mathrm{C}$ |
| Power Supply Box: $0^{\circ} \mathrm{C}$ to $+40^{\circ} \mathrm{C}$ |
| Humidity: |
| $85 \%$ RH or lower (with no condensation) |$|$| Altitude | Not higher than 2000 m above sea level <br> Indicator and scale : 3 <br> Power Supply Box: 2 |
| :--- | :--- |
| Pollution degree | FJ pole stand <br> FJ table stand <br> Extension DC power supply cable (in 5m units, max. 95 m ) <br> Glass windshield, size S, M and L <br> Power supply box M |

Appendix 1-3 Dimensional outline drawing

## Appendix $2 \quad$ Operation of the setting menu

-Setting of various functions

(2) [Direction] key $\Rightarrow$ Shift to the intended setting item.
(3) [Enter] and [Direction] keys $\Rightarrow$ Change the setting value.

## -Returns to the state of weighing after completion of setting

## Appendix $3 \quad$ Setting menu hierarchy list

-Hierarchy of functions related to the operation

## -Hierarchy of functions related to the performance

■Hierarchy of user information setting

## - Hierarchy of the external input/output functions

## -Hierarchy of functions related to the lock

## ■Hierarchy of controlling and adjustment functions

Legal
Metrology

## Appendix $4 \quad$ Print sample

-Span ajustment result

## Index of Terms

[A]
Actual value setting method ..... 35, 38, 42
Adding function ..... 21
Addition accumulated ..... 21
Auto power-off ..... 28
[C]
Character font ..... 6
Check sum ..... 76
Coefficient value setting ..... 45
[D]
Date ..... 61
Direct start ..... 28
[E]
Error messages ..... 79
Execution menu ..... 71
[F]
Factory settings ..... 67
[G]
GLP ..... 75
[ I ]
Inputting of characters ..... 17
Inputting of numeric values. ..... 16
[L]
Lock ..... 56, 57
[M]
Main LCD ..... 5, 12
Maintenance ..... 70
Maintenance setting ..... 60
Minimum ..... 65
Minimum weighed value ..... 78
Minimum weight ..... 64
Minus side addition. ..... 21
[ N ]
Numeric value setting method.35, 36, 38, 39
[P]
Password ..... 62, 63
Plus side addition ..... 21
Program number ..... 76
[R]
Response ..... 52
Response speed ..... 31
[S]
Scale ID ..... 60
Span adjustment. ..... 67
Stability discrimination frequency ..... 31
Stability discrimination width ..... 30
Sub LCD ..... 12
Sub LCD ..... 6
[T]
Tare ..... 10
Tare weight ..... 77
Time ..... 61
[U]
Unit setting ..... 20
User information ..... 72, 73
[W]
Weight renewal interval ..... 32
[Z]
Zero adjustment range ..... 9
Zero tracking ..... 30

[^0]:
