

Skalapp® DV

SCALE FOR MOBILE AND STATIONARY CONVEYOR BELTS

Powered by today's most advanced weighing technology and high-quality components, Skalapp DV scales provide accurate weighing and monitoring of materials transported by a wide range of conveyor belt systems. They're a valuable tool in effectively measuring the efficiency of your conveyor system, as well as helping you define and optimize costs for material processing.

Skalapp DV is the answer for keeping track of processed material and downtime on your production line, as well as gathering data from remote machinery, such as a mobile shredder loaned to another plant.

Features

Modern touch screen	✓
Voltage Input	24 VDC
Max load of the weighing frame	400 kg
Minimum load	8 kg/m
Weighing frame width	from 500 to 1600 mm
Belt speed measurement	✓
Printer connection	✓
Order management	✓
Hourly flow rate	✓
Operational history	✓
Virtual conveyor function	✓
Data transfer to Skalapp Online*	✓
Productivity analysis*	✓

*Skalapp Online is an optional service

BENEFITS

Optimized Operation

- Provides a comprehensive overview of performance metrics.

Minimized Downtime

- Features robust components and remote diagnostics capabilities.

Multi-Belt Solution

- Allows integration of up to seven scales within a single control unit

**Customer-driven
design and
development.**

Skalapp[®] Online

FULL REMOTE ACCESS...
ALL SCALES,
ALL LOCATIONS

Skalapp Online is an optional cloud service that can be activated for all SKALAPP scales via a SIM card or WiFi.

Upon activation, you can access complete, up-to-date weighing data from all of your scales, at all locations, from your computer or mobile phone.

Timely, securely, conveniently.

BENEFITS

Remote access

– Current weighing data from every scale at every location

Analyze/Assess

– Real-time or saved data

Manual operations kept to a minimum

– Automated generation/printing of reports and delivery documentation

Full integration

– Compatible with your in-house ERP

Optimized across devices

– Mobile phones, tablets, computers
