ABOUT TELTEK...

Teltek designs, manufactures and sells dynamic scales and peripheral equipment. The scales have integrated data systems and weigh, sort and handle products moving along production line conveyor belts. The integrated software registers the recorded weights and prepares various sets of statistics. Our weighing systems are noted for their excellent communication with other equipment in the production facilities where they are used. Teltek's weighing systems are used primarily in light industries such as the foodstuff and pharmaceutical industries. The company has a wide, international customer base.

Sales are via a network of distributors.

Teltek C-platform

Teltek C-platform makes the base of the checkweighers in Teltek C-series. Hardware as well as software is developed by Teltek and give our checkweighers very high performance in weighing.

Teltek C-platform can be combined with many different applications to be able to fit in a large amount of different environments.

Combine Teltek C-platform with either the C20, C60 or C80 interface.

TELTEK

C60 Checkweigher

Teltek C60 is a technical advanced checkweigher and is built for high demands regarding accuracy, reliability and good possibilities for communication. The C60 is built to work in a big variety in production environments. Teltek C60 is built on our platform Teltek C to guarantee high accuracy in high speed of production.

Combine Teltek C60 with a price applicator, a metal detector or both or let the checkweigher control your filler to achieve a lower level of give-aways. Teltek C60 is simple to use and has a easy-to-understand menu with a large 15" VGA display. The function keys are integrated on the display which eliminates the need of external keyboard.

The Teltek C60 is computer based and features advanced electronics and new, customizable software. The system uses a high contrast, colour screen which gives razor sharp displays not only of weighing results and charts of individual weights and averages but also of information on the article being processed.

15" VGA display

Very easy to handle

Teltek developed software

TELTEK C60

The menu screens make full use of drop-down sub menus which help operators get the most out of the system. Product changes and alterations in product details can be made quickly and easily with a minimum of downtime.

Among much else, the software supplied as standard includes a 250 article register with room for tare, nominal weight, upper and lower weight limits, TU2 and conveyor speed. Other menus permit adjustments of sorting signals, selection of a variety of printouts and diagnostic testing.

The systems statistical capabilities include averages, standard deviation and weight charts.

Teltek C60 comes with conveyor dimensions and quantity of your choice. The conveyors are made for a minimum of maintenance and are driven by brushless DC-motors.

Teltek C60 is approved in accordance to European MID.
